THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE ACT 50 U.S.C. 31 AND 32. AS AUTHORIZED, ITS TRANSMISSION OR THE REVELATION OF ITS CONTENTS IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

1. In connection with the delivery of the T-113 tube, it became known that T-111 and T-112 tubes were also manufactured in THALHEIM (u 52/E 14).
2. The tubes in question are forerunners of the T-113 tube. They were produced only temporarily and in a very small quantity. In addition to the T-113, T-114 and T-115 tubes were produced.
3. Technical data:

Tube T-111: **Acid current** 10^{-11} Amp.

Tube T-112: $\text{grid current } 10^{-12} \text{ Amp.}$

Tube T-113: acid current 10^{-13} amp.

Tube T-114: 10^{-14} Amp.

Tube T-115: ~~noise~~ **current** 10^{-15} Amp.

The grid current of T-111 and T-112 was not quite as low as that of T-113. The T-114 and T-115 tubes have an even lower current. The T-113 sufficed in many cases the T-115 being more complicated in design.
